

In 2023, Kraft Heinz became a founding member of the Dairy Methane Action Alliance (DMAA), a global coalition of major food companies led by the Environmental Defense Fund, that works to catalyze accountability, transparency and ambitious climate action within the food industry.

### Dairy Methane Disclosures

Annual methane emissions			
<b>Total emissions</b>			
	Baseline (2021)	2023	% Change from baseline
Scope 1	586,455	455,972	- 22.2%
Scope 3	27,616,259	24,332,316	- 11.9%
<b>Methane from dairy supply chain Mt CH<sub>4</sub>/year</b>		<b>Dairy methane as % of total emissions</b>	
	2023		2023
Total	99,210 MT	Total	11.21%
Scope 1	0	Scope 1	0
Scope 3	99,210 MT	Scope 3	11.42%
<b>Emissions reduction goals/targets</b>			
<ul style="list-style-type: none"> <li>Achieve net zero greenhouse gas (“GHG”) emissions across our operational footprint (Scope 1 and Scope 2) and entire global value chain (Scope 3) by 2050</li> </ul>			
<b>Qualitative explanation of key sources of methane in company’s operations and supply chain</b>

*The 2023 Scope 3 data and related dairy methane as a % of total emissions was updated in February 2026 to agree with data presented in our 2024 ESG Report. The data presented is based on the best available information at the time of publication. As we continue to refine methodologies and improve data quality, prior period emission figures may be restated.*
